EDUCATION

Stanford University

B.S. in Management Science and Engineering, Minor in Computer Science

Expected: June 2027

Stanford, CA

- **Relevant Coursework:** Economic Principles, Information Networks and Services, Data Optimization, Applied Statistics, Probability, Matrix Methods, Programming Methodology/Abstractions, Directed Research: AI Augmentation and Spatial/Textual Analysis
- **Awards & Affiliations:** Stanford Tech Ethics and Policy Fellow, Institute for Human-Centered AI, Black Product Managers Network, Candidate for the Notation in Science Communication, Society of Black Scientists and Engineers (SBSE), Out in STEM (oSTEM)

SKILLS

Technical: Microsoft Excel, Python, C++, SQL, JavaScript, MATLAB, Git, CRM Systems

Analytical: Data Analysis, Data Visualization, Quantitative Modeling, UX/UI Design (Wireframing & Prototyping)

Finance: Financial Modeling, Valuation, Budgeting, Forecasting, Financial Reporting, Variance Analysis, Scenario and Sensitivity Analysis, Portfolio Analysis, Risk Assessment, Client Relations

EXPERIENCE

EP Wealth Advisors

Financial Planning and Analysis Intern

June 2026 - Present

Torrance, CA

- Incoming FP&A Intern for Summer 2026.

Mozilla

Responsible Computing Intern

June 2025 - September 2025

Los Angeles, CA

- Executed cross-institutional analysis on responsible computing, involving data scrubbing and ecosystem mapping to assess AI and computational infrastructure throughout sub-Saharan Africa and the Global South.
- Conducted comprehensive legal and policy audits to evaluate compliance with regional and international data protection regulations, identify significant risk exposure in AI infrastructure, and ensure consistency with organizational ethical standards.
- Synthesized documentation and datasets to establish strategic guidance for sustainable program-level faculty-student partnerships.

Accenture

Business Analyst Intern

June 2024 - August 2024

Los Angeles, CA

- Analyzed platform and financial performance for cross-functional initiatives, aggregating data from major client accounts (e.g. Disney, Netflix) throughout FY24 to guide strategic planning and project timelines for FY25.
- Collaborated with subject matter experts to facilitate training/client demonstrations and guide product roadmap development.
- Actively pursued advanced professional development to strengthen technical proficiency in strategic consulting and financial modeling.

LEADERSHIP & PROFESSIONAL DEVELOPMENT

Lighthouse

Co-Founder, Chief Product Officer

June 2025 - Present

New York, NY

- Engineer and refine data-centric components for a web-based media platform aimed at improving information analysis.
- Secured \$250K in pre-seed funding and letters of intent (LOIs) from K-12 schools and districts while leading overall product development and execution, contributing to financial projections, and spearheading investor communications.
- Conduct user research with Gen Z students to identify market gaps, validate demand, and inform growth strategy.

Stanford Consulting

Senior Consultant

November 2024 - Present

Stanford, CA

- Chosen as one of 20 members from a pool of over 400 Stanford student applicants following a rigorous consulting-style recruitment process focused on case studies, market sizing, and presentation skills.
- Formulate engagement strategies and strategic evaluations for clients in Silicon Valley via paid quarterly engagements.
- Maximize project productivity and decision-making by leveraging comprehensive training programs and client development assets.

America On Tech

Data Science Fellow

September 2023 - Present

Los Angeles, CA

- Build and validate predictive models on large-scale datasets to inform real-world portfolio and strategy decision-making.
- Actively pursue professional certifications in Python, SQL, and AWS, complemented by intensive participation in career development workshops led by senior DS/ML engineers from industry leaders such as FactSet, NBCU, and DreamWorks.
- Cultivate advanced proficiency in critical technical domains: data visualization, data pipeline curation, deep learning architectures, machine learning methodologies, and ethical data governance principles.
